What to send, rules & FAQ

# Services & what you get

Every service comes with extra files at no extra cost. You get more than the main file.

## 1 AI Video Dubbing

Your video translated and re-voiced in another language. Background music and sound effects stay in place, and the timing follows the original. Accent and dialect options are available.

**Best for:** YouTubers, creators, ads, explainers, product demos

**YOU GET**

- Dubbed video (MP4)
- Dubbed audio track (MP3 / WAV)
- Separate voice and background tracks
- Original transcript and translated script
- Subtitles (SRT) in every language

## 2 Your Own AI Voice

The dub speaks in **your own voice**, in 90+ languages.

**YOU GET**

- Your voice in each language you order
- Voice profile kept for future orders
- The same voice on every video

**Requires:** your consent as the speaker

## 3 Podcast & Multi-Speaker Dubbing

Interviews and conversations where every speaker keeps a distinct voice.

**YOU GET**

- Dubbed episode with music kept
- Transcript with speaker labels
- A separate track for each speaker

## 4 Text-to-Speech Voiceover

Send a script and get a natural, professional voiceover.

**YOU GET**

- Voiceover (MP3 / WAV)
- 2–3 voice samples to choose from
- Pronunciation fixes for names and brands
- Versions in other languages

## 5 Speech-to-Text Transcription

Accurate transcripts of videos, podcasts, meetings and interviews.

**YOU GET**

- Transcript with timestamps (TXT / DOCX)
- Speaker labels
- Subtitle files (SRT / VTT)
- Translated transcripts in any language

# More services

## 6 Audio Cleanup & Enhancement

Removes background noise, hum and room echo, then evens out the volume.

**YOU GET**

- Clean voice track
- Volume levelled for YouTube and podcasts
- Separated background track
- A before/after sample

## 7 Subtitles & Translation

Subtitles timed to your video, in as many languages as you need.

**YOU GET**

- One SRT / VTT file per language
- Subtitles synced to your own script
- Optional subtitles burned into the video
- Translated script document

## 8 Custom AI Voice

A unique voice designed from a description, such as "warm, calm narrator".

**YOU GET**

- Your own unique brand voice
- 2–3 versions to choose from
- Reusable on every future order

## 9 Music & Sound Effects

Original background music and sound effects made for your video.

**YOU GET**

- Music track at your length
- Sound effects (WAV)
- Music as a separate track

## 10 Voice Changer

Re-voice your own recording in a different voice. Your timing, pauses and emotion stay the same.

**YOU GET**

- Re-voiced audio (MP3 / WAV)
- Several voices to choose from
- Matches your original timing

## 11 Expressive & Character Voices

Voiceovers with real emotion: whispers, laughs, excitement, suspense. Characters for stories, games and cartoons.

**YOU GET**

- Directed takes with emotion cues
- Alternate takes to choose from
- A consistent voice for each character

# Even more services

### 12 Multi-Voice Ads & Dialogues

Scripts with two or more voices: radio-style ads, explainers, e-learning role-plays.

**YOU GET**

- Fully mixed dialogue
- A separate track for each voice
- Music bed on request

### 13 Audiobooks & Long Narration

Books, courses and long scripts read in one consistent voice, chapter by chapter.

**YOU GET**

- One file per chapter
- The same voice and volume throughout
- Pronunciation list for names

### 14 AI Promo Videos

Short promo or trailer videos with AI-generated visuals, a voiceover in any language, and original music.

**YOU GET**

- MP4 in 16:9 or 9:16 (Reels / TikTok)
- Voiceover in your language or voice
- Separate music and voice tracks

### Subtitles & transcripts in every language

Any video or audio becomes text in the original language and in every language you choose: one subtitle file and one transcript per language.

**EXAMPLE: 1 ENGLISH VIDEO → 4 LANGUAGES**

- video_EN.srt · video_UR.srt · video_AR.srt · video_ES.srt
- transcript_EN.docx + 3 translated transcripts
- Timestamps and speaker labels in every file

# How a dubbing order works

1

**Transcribe**

Your original speech becomes a timed transcript.

2

**Translate**

Adapted to sound natural, with your terms kept exactly.

3

**Voice**

Your own AI voice (with consent) or a professional AI voice, synced to the video.

4

**Mix & check**

Music kept, levels balanced, every line reviewed.

# Before you order

1
**Choose**
Pick a package and any extras.

2
**Send**
Upload your original file and fill in the requirements.

3
**Review**
I dub, edit and quality-check every line.

4
**Receive**
Get all your files. Revisions are included.

## What to send me

- The **original video or audio file** (not a link)
- Source language and target language(s), plus accent if needed
- Number of speakers
- Names, brands and words that must not be translated
- Voice choice: your own AI voice (with consent), or a professional AI voice
- Files you need: MP4, audio, subtitles, separate tracks

## Rules

- You must **own the content** or have the right to translate it
- Your own AI voice only with the **speaker's written consent**
- No celebrity or public-figure voices, no impersonation, no deepfakes
- This is **audio** dubbing. Lip movements are not changed.
- The voices are created with AI tools

## FAQ

**Will it sound like me?**
Yes. With your own AI voice, your tone and style carry into every language. A light accent is normal.

**My language isn't in the core list. Can you do it?**
Probably. 94 languages are supported. Message me and I'll send a short free sample first.

**Can you dub a video with several speakers?**
Yes. Each speaker gets their own voice, and every voice stays consistent across languages.

**Which formats do you accept?**
MP4, MOV, MP3, WAV, M4A and most common formats.

**Is the background music kept?**
Yes. Speech is separated from music and sound effects, so only the voice changes.

**Can you match my dialect?**
For major languages, yes: for example Brazilian or European Portuguese, Egyptian or Gulf Arabic. You approve a sample first.

**Is the translation checked?**
Every line is reviewed and timed. Names and terms you give me are kept exactly.

**Can I use the result commercially?**
Yes. Commercial-use rights are available. See the package details on the gig page.
